

LTD Environmental Policy

LTD Limited understand that our operations impact upon the local and global environment and we are committed to the continual improvement and refinement of our working processes in line with our objectives and compliance obligations.

LTD Limited is committed to the protection of the environment, including prevention of pollution, sustainable resource use, climate change mitigation and protection of biodiversity and ecosystems.

We have implemented an Environmental Management System to ISO14001 standard. As part of this process we have undertaken an environmental review and identified our significant Environmental Aspects and Impacts and are committed to the monitoring and review of these.

Our Environmental Management System including Policy and Objectives is regularly reviewed to continually assess suitability, and identify and implement improvements to enhance environmental performance and fulfil our compliance obligations.

Achievement of this will involve assessment of both internal and external factors and engagement with our staff and supply chain. We are committed to minimising our waste, our use of toxic or unsustainable materials and our carbon footprint. We offset what cannot be avoided of our carbon footprint via myclimate.

LTD Limited is committed to protecting the environment at our offices, our installation sites and as part of the global community.

This policy was reviewed on 20th January 2018. This is to be reviewed on a yearly basis.
